SUMMARY

CompTIA Security+ and Network+ certified IT professional seeking an IT support, systems, or IT analyst role in St. Louis. Hands-on with Windows and Microsoft 365 administration, Active Directory, networking, and cloud identity through home labs, with documented runbooks for each fix. Founder of Velari, building websites, AI call answering, and missed-call text-back for local businesses.

CERTIFICATIONS

CompTIA Security+ | CompTIA Network+ | ITIL 4 Foundation | LPI Linux Essentials | AWS Certified Cloud Practitioner

TECHNICAL SKILLS

Systems and endpoints: Windows, macOS, Linux, Microsoft 365, Google Workspace, laptops, printers, mobile devices, hardware setup, Docker
Identity and access: Active Directory (Samba), Microsoft Entra ID, LDAP, Kerberos, OUs, security groups, MFA, password resets, onboarding and offboarding, AWS IAM
Networking and security: TCP/IP, DNS, DHCP, VPN, firewalls, least privilege, log review, vulnerability triage
Support and tooling: osTicket, ticket triage, troubleshooting, escalation, runbooks, remote administration, Python, Git, documentation

EXPERIENCE

Founder | Velari St. Louis, MO | 2026 to Present

- Run a web and AI services business that sets up websites, hosting, DNS, and AI call answering with missed-call text-back, helping local businesses turn more calls and visits into booked appointments.
- Offer small medical offices a free, HIPAA-aligned security starter kit as the first step into Velari's paid security readiness review, helping them map where patient data lives and set staff, device, and vendor policies.

Delivery Associate | Amazon St. Louis, MO | 2023 to Present

- Troubleshoot scanner, mobile app, GPS, and building-access issues across about 180 stops per shift, escalating unresolved problems with clear detail.

Personal Trainer | The Exercise Coach St. Louis, MO | 2022 to 2023

- Coached clients one-on-one on a fixed appointment schedule and kept confidential client records.
- Explained assessment results and progress in plain language to clients of all backgrounds.

TECHNICAL PROJECTS

Service Desk Lab | *osTicket, Samba AD, Docker* github.com/itsnmills/service-desk-lab

- Stood up osTicket and a Samba AD domain in Docker with OUs, security groups, test accounts, lockout policy, and LDAP/Kerberos sign-in.
- Worked 6 simulated tickets (provisioning, password reset, lockout, access change, offboarding, remote administration) and wrote a runbook for each.

Practice Trust Lab | *Samba AD, Docker, Python* github.com/itsnmills/practice-trust-lab

- Built a lab domain with Samba AD, domain-joined endpoints, file shares, and a mock records app, all in Docker.
- Wrote read-only Python scripts that pull account and host data from the domain into reports.

Cloud/IAM Access Review Analyzer | *Python, OAuth (PKCE)*

- Wrote a Python tool that merges Google Workspace, Entra ID, and AWS IAM account exports into one access review.
- Outputs a remediation queue, owner action plans, and a findings dashboard; tested on synthetic data.

EDUCATION

B.S. Information Technology | Western Governors University Expected December 2026
B.S. Exercise Science | Maryville University 2022
